Completion of Full Structural Weld Overlay in Response to Confirmatory Action Letter (CAL) NRR-07-024 (TAC No. MD4175)

Reference: 1) Nuclear Management Company, LLC (NMC) Letter No. L-PI-07-024, Dated March 14, 2007 (ADAMS Accession No. ML070740366)  
2) NRC CAL NRR-07-024, Dated March 27, 2007 (ADAMS Accession No. ML070800476)

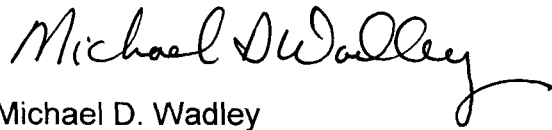

In Reference 2, the NRC issued the referenced CAL for Prairie Island Nuclear Generating Plant (PINGP) Unit 2. The CAL confirmed commitments made by NMC in Reference 1 regarding Alloy 82/182 butt welds on the PINGP Unit 2 pressurizer surge line nozzle. In Reference 1, NMC made three commitments:

1. Until all Alloy 600/82/182 Pressurizer butt welds are either mitigated or replaced, all Alloy 600/82/182 Pressurizer butt welds will be examined every other refueling cycle.
2. Until all Alloy 600/82/182 Pressurizer butt welds are either mitigated or replaced, reports of future inspection results and any mitigative or corrective actions will be submitted to the NRC within 60 days of the end of the station refueling outage during which the inspection/mitigation was performed.
3. NMC will notify NRC in writing prior to making any changes to the revised Commitments 1 or 2.

With this letter Northern States Power Company, a Minnesota corporation (NSPM), notifies the NRC (as requested in Reference 2) that the commitments made in Reference 1 are closed, since the Alloy 82/182 pressurizer butt welds have been mitigated by the application of a full structural weld overlay.

Summary of Commitments

This letter contains no new commitments and closes the three commitments made in Reference 1.

A handwritten signature in black ink, reading "Michael D. Wadley". The signature is fluid and cursive, with a long, sweeping tail on the final letter.

Michael D. Wadley
